dan.jasnow@afslaw.com

Dan is co-leader of the firm's Artificial Intelligence (AI) industry group—a cross-disciplinary team of more than four dozen lawyers practicing on the cutting-edge of AI law. In this capacity, he advises clients on safe and responsible AI design and deployment, acceptable use policies, regulatory compliance, and intellectual property protection and infringement. His clients range from early stage start-ups to some of the world's leading technology, consumer electronics, fashion, and media and entertainment companies. Among other topics, he has advised clients on the intersection of AI with copyright protection; employment law; medical devices; and wearable devices.

In addition to his experience in AI, Dan has significant experience in the alcohol beverage sector. He provides comprehensive legal guidance on the production, marketing, distribution, and sale of alcoholic beverages, including malt beverages, wine, distilled spirits, and hard seltzers. Among other things, he helps clients comply with regulatory requirements and develop effective marketing strategies.

Dan also advises on advertising and consumer protection risks. He has handled numerous successful advertising matters before the National Advertising Division of the Better Business Bureau and the National Advertising Review Board, with a focus on consumer electronics and telecommunications. Among other matters, he helped defend performance claims for OLED display technology and satellite reliability; and successfully challenged the reliability of substantiation for mascara volumizing claims. He also regularly advises clients on environmental advertising claims under federal and state advertising laws.

Dan has also been at the forefront of the metaverse and spatial computing legal space, drawing on his experience as in-house marketing counsel at Meta Reality Labs, where he advised on next-generation consumer electronics and AR/VR software products. Dan serves on the Future of XR Advisory Council Working Group on Interoperability and also helped ArentFox Schiff become the first major law firm to open an office in the metaverse. Dan co-founded and is a proud member of OutFox, ArentFox Schiff's LGBTQ+ affinity group.

Client Work

Dan counsels clients on compliance with a variety of regulatory domains:

- Assisting companies in devising company-wide generative AI tools policies to avoid intellectual property and other risks;
- Production, marketing, distribution, and sale of alcoholic beverages, including malt beverages, wine, distilled spirits, and hard seltzers;
- Brand and consumer protection;
- Environmental advertising claims under the US Federal Trade Commission’s “Green Guides,” including environmental sustainability, recyclability, biodegradability, and compostability claims; the use of renewable energy credits, carbon offsets, and renewable raw materials; and the development of competent and reliable substantiation and verification programs;
- Influencers, endorsements, and testimonials;
- Sweepstakes, contests, and charitable sales promotions;
- Minimum Advertised Price policies; and
- Escheat and abandoned property laws.

Intellectual Property

Dan advises clients on trademark and copyright matters. Among other things, he advises clients on intellectual property protection and enforcement online. He routinely advises clients on trademark clearance, prosecution, and infringements. In his copyright work, Dan focuses on infringement of digital works, such as streaming video content and copyright in computer software. He has advised clients on blockchain domains, handled several UDRP proceedings, and recovered infringing domain names and social media handles for clients.

Previous Work

Outside of the firm, Dan is an elected trustee of the Garrison Union Free School District, a public school district in Garrison, New York. Prior to joining ArentFox Schiff, Dan served as legislative correspondent and deputy press secretary in the Office of US Senator Jeanne Shaheen and as the candidate’s scheduler during her successful 2008 campaign.
